"Navy Seal Equipment" Navy Seals. Oct 30 <<http://navyseals.com/equipment>>

We would like to thank the Navy Seals for helping create the Body Suit 66. It will not be restrained to just the Navy Seals it will be able for US purchases and only the US. It will be a crime if sold to other countries.

"Body Armor" Security USA. Oct 30 <www.securityprousa.com/bodyarmor.html>

It will be coming to stores December 8th and online.

Body Suit 66

By the Navy Seals

Body Suit 66

The Body suit 66 was designed for and by the US Navy Seals. It has the same strength as a bullet proof vest but also the flexibility of Under Armour. It is only 1 centimeter thick and it has the ability to heat up and cool down depending on the temperature and the environment around the wearer.

This new body suit will be sold in 3 sizes and should fit all sizes. It weighs at maximum 3 lbs. And it will be made out of Kevlar and other materials we cannot release to the public. But it will be available in separate pieces if needed.

Body Suit 66 is the newest and the best apparel on the market at the moment. The suit can now change colors if the extra is purchased, it has 100 different color combinations built into it and it can change at any time needed. The suit can also withstand any type of heat or freezing temperature while still keeping the wearer's body temperature the same and normal.
